

Name: Ajay I

Email: ajayianraj.2401007@srec.ac.in

LinkedIn: <https://www.linkedin.com/in/ajay-i-a86298329/>

Github Profile: <https://github.com/Ajay-2007-bee>

Leet Code: <https://leetcode.com/u/ajay-2207/>

EXECUTIVE SUMMARY:

Enthusiastic Computer Science Engineering student skilled in predictive machine learning and building ai agents. Proficient in Python, Java and C, with a proven track record in competitive hackathons. Passionate about leveraging advanced ML models and robust architectures to develop scalable, data-driven solutions for real-world challenges.

EDUCATIONAL QUALIFICATION:

SSLC – Githanjali Public School ,CBE - CBSE– 2022

HSC - Githanjali Public School,CBE - CBSE - 2024

B.E (Computer Science and Engineering) – Sri Ramakrishna Engineering College, Anna University, 2028, CGPA: 9.08.(Upto 4th Sem)

TECHNICAL SKILLS:

1. Problem solving
2. Full-stack development
3. Predictive Machine Learning
4. Relational Database
5. Rapid prototyping
6. Data analytics

LANGUAGES KNOWN:

Java, Cpp, C, Python

PROJECTS:

1. Workforce Contribution Monitor

Objective: To analyze and bridge the gap between employee activity volume and actual work impact by deriving meaningful contribution metrics. Developed a full-stack evaluation system that integrates and correlates data from communication platforms (Slack) and execution platforms (GitHub) to assess real workforce productivity. Designed a custom scoring algorithm to differentiate between high activity and high-impact contributions, enabling more accurate performance insights. Implemented automated data ingestion pipelines using APIs to fetch, process, and normalize multi-source data. Built an interactive and responsive dashboard to visualize contribution patterns, trends, and performance indicators for better decision-making. Focused on modular backend architecture and efficient database handling to ensure scalability, real-time processing, and maintainability of the system.

Technologies: React & Tailwind CSS (frontend UI), Python & FastAPI (backend API), sqlite (database management), GitHub & Slack APIs (data ingestion)

2. AI Customer Feedback Intelligence & Retention System

Objective: To analyze customer sentiment, predict churn, and automate personalized retention strategies. Developed a system that analyzes multi-channel customer feedback to detect dissatisfaction and predict churn. Implemented sentiment analysis and behavioral modeling to identify at-risk users. Designed an automated pipeline to trigger personalized follow-ups via email and WhatsApp based on risk levels. Integrated a multi-agent decision framework to recommend actions such as refunds, escalations, or retention offers, improving decision efficiency.

Technologies: Python, NLP (Transformers), FastAPI, React, Twilio API / WhatsApp API, PostgreSQL

3. Satellite-Based Water Quality Monitoring & Prediction System (Mini Project)

Objective: To enable large-scale monitoring and prediction of water quality using satellite data and machine learning. Developed a system that processes satellite imagery and geospatial data to predict key water quality parameters using **CatBoost Regressor**.

Engineered features from spectral and environmental data to improve model performance. Built a data pipeline for automated ingestion, preprocessing, and prediction, along with visualization modules to analyze spatial and temporal trends.

Technologies: Python, CatBoost, Pandas, NumPy, Geospatial Processing, Data Visualization Tools.

4. ChainWatch – Blockchain AML Intelligence System

Objective: To detect suspicious cryptocurrency transactions using machine learning and behavioural analysis. Developed a real-time system using XGBoost, Isolation Forest, graph analytics, and multi-agent pattern detection to identify high-risk wallet activity and generate explainable risk scores.

Technologies: Python, FastAPI, XGBoost, Isolation Forest, NetworkX, Firebase, JavaScript

CERTIFICATIONS:

1. Introduction to Artificial Intelligence– Infosys Springboard
2. Cleared Business English Certificate (BEC) - Business Preliminary Examination.

ACHIEVEMENTS:

1. **FIRST PRIZE** - 24 hrs HACKTIDE HACKATHON held at Amrita Vishwa Vidyapeetham, Cbe on 08.01.2026 and won (**₹ 25,000**).
2. **SECOND PRIZE** - 12 hrs Hackathon at Sri Ramakrishna College of Arts & Science (SRCAS) Coimbatore, on 17.02.2025 and won (**₹ 2500**).
3. **THIRD PRICE** – 24 hrs HACKATHON – VELOHACK'26 held at Vel Tech University , Chennai on 11.09.2026 and won (**₹ 16,000**)

DECLARATION:

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
