STUDIO EDITION · 3D-rendered actual-size DIY cut-out kit for the 46 × 30 cm model

HOW TO BUILD

1. Print at 100 % ("Actual size", NOT "fit to page") on A4 matt/photo paper, best quality.
2. Check the scale ruler: it must measure exactly 10 cm.
3. Cut along the solid black lines; they trace each object's outline. Fold on dashed lines.
4. FRONT | BACK pairs: cut both, glue back-to-back on 1–2 mm card; fold the grey foot tab to stand.
5. Box nets (books, tablet, phone, AI base): score folds, glue tabs inside, pack with card.
6. Platform skins wrap a foam/card box of the same size; fascia halves overlap 4 mm.
7. Signboards, headings and the cloud look best mounted on 3 mm foam board.
