

EX.NO.8d	JAVASCRIPT DOM (SIMPLE FORM WITH DISPLAY)
DATE: 07.09.26	

AIM:

To read a value typed into an HTML form and display a personalised greeting on the same page using JavaScript DOM methods.

ALGORITHM:

1. Create a form with a text box and a Greet button.
2. Write a function that reads the value of the text box with getElementById().
3. Check whether the box is empty and show a warning if it is.
4. Otherwise build a greeting message from the entered name.
5. Write the message into a paragraph using innerHTML.
6. Enter a name in the browser and verify the displayed greeting.

CODE:

```
<!DOCTYPE html>
<html>
<head>
  <title>Greeting Form</title>
  <style>
    body { font-family: Arial; margin: 40px; }
    input, button { font-size: 16px; padding: 8px 12px; }
    #out { margin-top: 20px; font-size: 20px; color: #0a6b2d; font-weight: bold; }
  </style>
</head>
<body>
  <h2>Greeting Form</h2>
  <input type="text" id="nm" placeholder="Enter your name">
  <button onclick="greet()">Greet</button>
  <p id="out"></p>
  <script>
    function greet() {
      var n = document.getElementById("nm").value.trim();
      var o = document.getElementById("out");
      if (n === "") {
        o.style.color = "red";
        o.innerHTML = "Please enter your name.";
      }
      else {
        o.style.color = "#0a6b2d";
        o.innerHTML = "Hello, " + n + "! Welcome to the Web Technologies Lab.";
      }
    }
  </script>
</body>
</html>
```

OUTPUT:

Empty form

**Greeting Form**

Greeting displayed after clicking Greet

**Greeting Form** **Hello, Akhilesh Raj P! Welcome to the Web Technologies Lab.****RESULT:**

Thus, a simple form was created and the entered name was displayed as a greeting using JavaScript.
